

Abeer Wael

Computer and Information Student

abeer.wael18@gmail.com | +201060931756 | [Linked](#)
Behaira, Egypt

OBJECTIVE

Computer and Information Science student with a strong foundation in Python, Java, Frontend Development, and Networking fundamentals. Experienced in academic projects involving OOP, GUI development, databases, and AI-based game development. Interested in Frontend Development, Problem Solving, and Software Development opportunities to enhance technical and practical skills.

EDUCATION

OCT 2024 - JUL 2028

Bachelor's Degree in Computer and Information Science
Damanhour University, El-Nobaria City

Relevant Coursework:

Programming Fundamentals (Java), Object-Oriented Programming (Java), Data Structures (Java), Database Systems, Discrete Mathematics, Logic Design, Artificial Intelligence, Computer Architecture, Data Communication

TECHNICAL SKILLS

Programming

- Python
- Java
- C++

Web

- HTML
- CSS

Concepts

- OOP
- Data Structure

Networking Fundamentals

- OSI Model
- Network Topologies
- Routing Basics
- LAN/WAN
- Cloud Basics
- Network Security Fundamentals

PROJECTS

Escape Room Game (AI Project – Python) - Team Project

- Developed an Escape Room game using the Breadth-First Search (BFS) algorithm to simulate an AI agent navigating the environment.
- Implemented logic enabling the AI to explore the game space, solve puzzles, and determine the shortest escape path.
- Designed two interfaces: a user interface for gameplay interaction and an AI interface for automated solution execution.
- Applied Object-Oriented Programming (OOP) concepts to structure game components and logic.

Educational Management System (Java Project) - Team Project

- Developed an educational management system allowing students to enroll in courses and submit assignments, while instructors create courses, manage assignments, and assign grades.
- Designed and implemented the system database using SQL Server.
- Built parts of the graphical user interface using Java Swing.
- Integrated database functionality with application modules to support course management, assignment submission, grading, and user administration.
- Applied Object-Oriented Programming (OOP) and Data Structures concepts in system design and implementation.

Pizza Restaurant Website (Frontend Project) - Individual Project

- Developed a multi-page restaurant website using HTML, CSS, and basic JavaScript.
- Designed and implemented five pages: Home, Menu, About, Contact, and Order.
- Added interactive UI behavior including animated pizza rotation using JavaScript.
- Implemented navigation between pages and a basic order form interface.
- Enhanced user experience by dynamically adjusting input field size for better layout consistency.

INTERNSHIPS

Jul 2025 - Aug 2025	Network Infrastructure Intern	–	National Telecommunication Institute (NTI), Damanhour
	• Studied network infrastructure fundamentals including network design, configuration, and troubleshooting. • Learned routing basics, LAN/WAN technologies, IP addressing, MAC addressing, and networking devices. • Practiced network configuration and simulation using Cisco Packet Tracer. • Gained introductory exposure to cloud computing concepts and cybersecurity threats.		

TRAINING & CERTIFICATIONS

Python Programming Training – Information Technology Institute (ITI) - 60 Hours

- Learned Python programming fundamentals including variables, control structures, functions, and Object-Oriented Programming.
- Practiced problem-solving techniques through structured programming exercises.

Python Programming Training – Sprints - 40 Hours

- Applied Python concepts through hands-on exercises and implementation tasks.
- Strengthened programming logic and practical coding skills using real examples.

PROBLEM SOLVING & COMPETITIVE PROGRAMMING

- Continuously practicing problem solving using Codeforces and VJudge platforms.
 - Solving programming problems focused on algorithms, logical thinking, and data structures fundamentals.
 - Participating in internal programming contests at the Faculty of Computer and Information Science.
-

SOFT SKILLS

Communication
Teamwork
Leadership

Time Management
Adaptability
Presentation Skills
